

Knowledge Organisers

Year 9
Spring Term 2024

Name: ______

Instructions for how to use your Knowledge Organiser

After school, every day, you should learn knowledge from **TWO** subjects on your knowledge organiser each night. Your class teacher may set you specific tasks on Satchel One linked to the knowledge that you will be expected to learn. The timetable below tells you which subjects you should focus on each night. It doesn't matter if you don't have that particular subject on that day, just follow the timetable for your home learning. You should spend **half an hou**r on each subject.

TIMETABLE OF SUBJECTS

Monday: English and Geography

Tuesday: Science and Art / DT / Food

Wednesday: Maths and History

Thursday: RE and Computer Science

Friday: MFL and Music / Drama

Reading at home

There is also an expectation that you should read a book of your choice for 30 minutes everyday.

These notes are based on your lessons this Spring term.

It is important that you develop your knowledge by reading over these notes each night.

How to learn knowledge from my knowledge organiser:

- Look at the work, cover it over, write it out again and check it.
- Look. Cover. Write. Check.
- Ask someone to test you and ask you questions about the topic
- Create mind maps on the topic
- Create flashcards on the topic
- Try writing out the key words or new vocabulary into new sentences
- Create a mnemonic
- Draw a diagram of the process
- Read further around the subject

English Spring Term: Year 9 Descriptive Writing

Expectations

Your writing needs to be convincing and compelling. Tone, style and register are assuredly matched to purpose and audience. Extensive and ambitious vocabulary with sustained crafting of linguistic devices. Varied and inventive use of structural features. Writing is compelling, incorporating a range of convincing and complex ideas. Fluently linked paragraphs with seamlessly integrated discourse markers.

Wide range of punctuation is used with a high level of accuracy. Uses a full range of appropriate sentence forms for effect. Uses Standard English consistently and appropriately with secure control of complex grammatical structures. Extensive and ambitious use of vocabulary.

<u>Key Terms</u>				
Narrative voice	the perspective the story is told from			
Allusion	an expression designed to call something to mind without mentioning it explicitly	G		
Setting	Where the story takes place	e		
Symbolism	Symbolism an artistic and poetic movement or style using			
symbolic images and indirect suggestion to exp		<u> </u>		
	mystical ideas, emotions, and states of mind	∐ ∨		
Connotations	An idea or feeling created by a particular word	Tr		
Clause: A part	An independent clause: part of a sentence that	R		
of a sentence	makes sense by itself A dependent clause: part of a sentence which	Sı		
	requires more information	U		
Natural	Natural imagery means a congruous set of images	U		
Imagery	depicting the world of nature.	G		
Religious Imagery				

Example:

As I neared the foot of the mountain, such was its mass I could no longer see sky. Pausing at the base of it, I noticed that the wind had abated somewhat, and I felt a brief flash of renewed confidence. Glancing up its steep face my eyes scanned the wild, rocky terrain, peppered with tufts of grass and high reeds. No discernible path appeared to etch through it, which led me to believe that nobody of sound mind would be foolish enough to scale it, nobody as foolish as me at least. Warding off the temptation to turn back, I placed my trusty staff before me and carefully distributed my weight across the unstable ground. With no visible path to speak of I lunged forward and begun to climb, praising each successfully placed step as I slowly advanced. Reaching roughly a meter high, I felt the first cool drop of rain blotch my forehead. It caused me to glance up instantly at the sky with trepidation, but before I would be greeted by an onslaught of raindrops, I decided to forge on undeterred. A violent rush of wind suddenly rose beneath me, causing the hood of my coat to blow clean over my head. Maybe it was a sign, I thought. Nature's way of telling me that I should prepare for the inevitable drenching. But I did my best to not entertain such thoughts. Instead, my mind was cast back to the days of my youth.

	Ambitious Vocabulary			
4	Glancing	Undeterred		
4	everlasting	Luminescent		
	Wanderlust	Harmonious		
	Metamorphosis	Blissful		
	Tranquil	Volatile		
	Ravine	Ceaseless		
	Sublime	Passively		
╛	Unremitting	Omnipotence		
	Unfathomable	Primaeval		
$\frac{1}{2}$	Glaciers	Mangled		
- 1				

Maths Year 9 Spring Term: Data

26

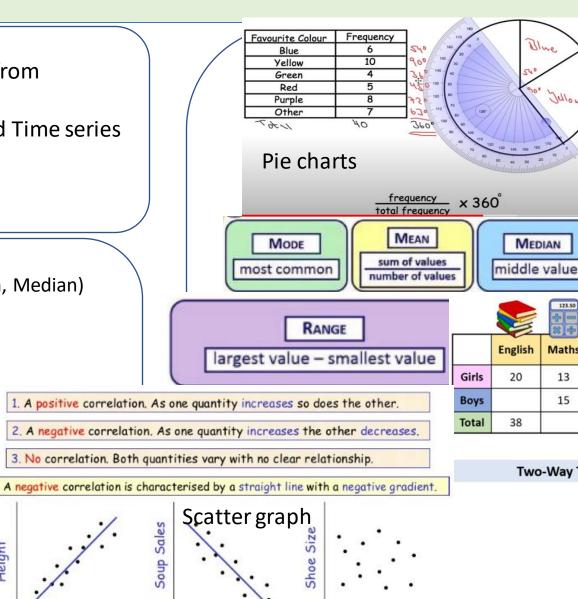

- **Topic** Finding averages from tables/diagrams
- Scatter graphs and Time series
- Pie charts
- Two-Way tables

Key words

Height

Shoe Size

- Averages (Mode, Mean, Median)
- Spread (Range)
- Frequency
- Scatter
- Frequency Polygon
- Two-way tables
- Stem-and-leaf
- Grouped frequency

Annual Income

Science Year 9 Spring Term: Physics Heating

P3.2 Knowledge Organiser

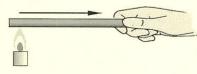

Internal energy

- 1. Internal energy = kinetic energy of the particles in a system + potential energy of particles in a system.
- 2. Particles in solids, liquids and gases have kinetic energy because they are always moving.
- 3. The hotter a material is the faster its particles move and the larger the kinetic store of energy.
- 4. Particles have potential energy because their motion keeps them separated. The further apart the particles the larger the potential energy.
- 5. Particles in a gas have more internal energy because they have more kinetic energy and potential energy.
- 6. Heating changes the energy stored in the system by increasing the energy of the particles that make up the system.
- 7. Heating either raises the temperature of the system or produces a change of state.
- 8. The thermal energy of an object depends on its mass, temperature and what it is made of.

Thermal transfers

- 9. Energy transfers from hotter substances to cooler substances.
- 10. Temperature is a measure of the motion and energy of the particles. It is related to their kinetic energy.
- 11. When thermal energy is transferred to an object by heating, its temperature depends on what the substance is made from, its mass and the amount of energy transferred.
- 12. The more thermal energy transferred the higher the temperature unless there is a change in state.
- 13. Conduction is thermal transfer by the vibration of particles.

14. Metals are good thermal conductors because they contain delocalised (free) electrons which can move freely through the metal.

- 15. Convection is thermal transfer when particles in a heated fluid rise.
- 16. A fluid is a substance with no fixed shape - a liquid or a gas.
- 17. Liquids and gases expand when they are heated, the gaps between particles increases.
- 18. The liquid or gas becomes less dense and rises. The denser, colder fluid sinks. forming a convection current.

- 19. Radiation is the transfer of thermal energy as a wave.
- 20. Thermal transfer by radiation can occur in a vacuum as it does not require particles.
- 21. Some surfaces are better than others at absorbing and reflecting radiation. Shiny silvered surfaces are good at reflecting radiation.

P3.2 Knowledge Organiser

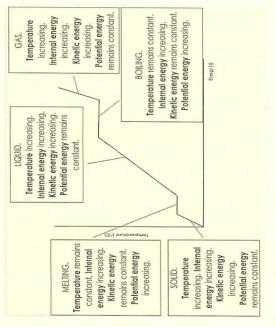

Specific heat capacity

- 22. Specific heat capacity is the energy needed to raise the temperature of 1 kg of substance by 1 °C.
- 23. $\Delta E = m c \Delta \theta$
 - a. $\Delta E = \text{energy change (J)}$
 - b. m = mass(kg)
 - c. c = specific heat capacity (J/kg
 - d. $\Delta\theta$ = temperature change (°C)
- 24. Different materials require different amounts of energy to heat up or change state.

Specific latent heat

- 25. Specific latent heat of a material is the energy needed to change the state of 1 kg of the substance with no change in temperature.
- 26. E = m L
 - e. E = energy for a change of state (J)
 - f. m = mass (kg)
 - g. L = specific latent heat (J/ka)
- 27. Specific latent heat of fusion refers to a change of state from solid to liquid.
- 28. Specific latent heat of vaporisation refers to a change of state from liquid to vapour.
- 29. Different materials have different latent heats.
- 30. When a substance changes state the kinetic energy does not increase, the absorbed energy goes into the potential energy store. The increase in energy is used to weaken the forces of attraction between particles to enable a change in state.
- 31. A solid substance at its melting point has less energy than the same mass of the substance when it is a liquid at the same temperature.

Science Year 9 Spring Term: Biology Human interaction and biodiversity

B3.2 Knowledge Organiser

Science Mastery

Biodiversity

- 1. Biodiversity is the variety of different species in an ecosystem
- 2. Biodiversity can be measured by using sampling techniques to count the abundance of different species
- 3. A quadrat is a piece of equipment (a frame) used to count the abundance of species

- 4. Random sampling is used to measure Global Warming the abundance of a species in a particular habitat, using quadrats placed at random coordinates
- 5. Systematic sampling is used to measure the effect of a factor on the distribution of a species, using a transect with quadrats placed at regular intervals
- 6. High biodiversity makes an ecosystem stable because each species is not dependent on just one other

How Humans affect Biodiversity

- 7. Many human activities are reducina biodiversity on Earth
- 8. The global population is increasing, so more resources are needed and more waste is being produced
- 9. Pollution is caused when waste is not properly treated
- 10. Pollution can be very harmful to plants and animals and reduce biodiversity
- 11. Pollution does not always affect all species equally, as some may be more resistant
- 12. Biodiversity is reduced by humans using land for building, quarrying, farming and waste disposal
- 13. Peat from peat boas is used for compost for gardens and farms, destroying habitats

- 14. Scientists and other citizens are using different methods to counteract some of the negative impacts of humans on biodiversity:
 - Protecting rare habitats
 - Maintaining nature reserves
 - Breeding programmes for endangered species
 - Recycling resources to reduce landfill waste
 - Reducing deforestation
 - Growing hedgerows on farms to allow more crops to grow

- 15. Levels of carbon dioxide and methane (greenhouse gases) in the atmosphere are increasing, contributing to global warming
- 16. Human activities contribute to areenhouse gas emissions, particularly the burning of fossil fuels in industry and transport
- 17. There are many biological consequences to alobal warming includina:
 - Melting polarice caps
 - Risina sea levels
 - Extreme weather patterns
 - Flooding
 - Loss of habitats

Human Waste

- 18. The increasing human population means that more resources are required and more waste is produced
- 19. More waste is also produced through the improved standard of living
- 20. If waste is not treated properly it results in pollution:
 - · Water pollution is caused by poor sewage treatment and leaching of fertilisers
 - Air pollution is caused by smoke and acidic gases

B3.2 Knowledge Organiser

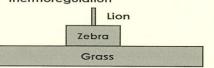

Science Mastery

 Land pollution is caused by landfill and toxic chemical waste

Pyramids of Biomass

- 21. Biomass is lost between trophic levels in a food chain
- 22. Producers (mostly plants and alage) transfer about 1% of the light energy they absorb for photosynthesis
- 23. Only approximately 10% of biomass from each trophic level is transferred to the level above
- 24. Biomass is lost through waste (faeces, urine, sweat, gas) and through life processes such as movement and thermoregulation

Farming and Biotechnology

- 25. Efficiency of food production (between trophic levels) can be improved by restricting energy transfer from food animals to the environment
- 26. This includes intensive farming methods where movement of animals is limited and the temperature of their surroundings is controlled
- 27. Fish stocks in oceans are declining because of overfishing
- 28. Fish stocks need to remain at a high enough level for breeding to occur, to prevent the disappearance of some species
- 29. Fishing quotas are used to ensure that ocean fish stocks remain at a sufficient level and net sizes can be restricted to prevent juvenile fish being caught, so they can then have their own offspring

- 30. Modern biotechnology allows large quantities of microorganisms to be cultured for food
- 31. Fusarium fungus is used to produce mycoprotein (Quorn), a protein-rich food suitable for vegetarians
- 32. Fusarium is grown on glucose syrup in aerobic conditions before being harvested and purified
- 33. Genetically modified (GM) bacterium can be used to produce insulin to be harvested and purified to treat people with diabetes
- 34. GM crops, such as golden rice, can be used to provide increased nutritional value in areas where it is lacking

Food Security

- 35. Food security is having enough food to feed a population
- 36. Many factors can threaten food security:
 - Increasing birth rate means there is not enough food for the growing population
 - Changing diets in developed countries means that scarce food resources are being transported across the world
 - New pests and pathogens are affecting farming
 - Environmental changes, including droughts, which can lead to famines
 - Political instability and conflicts in some parts of the world threaten access to food and water
- 37. Sustainable methods must be found and used to feed Earth's population

Science Year 9 Spring Term: Chemistry: Qualitative Chemistry

C3.2 Knowledge Organiser

Science Mastery

Chemical reactions

- Chemical reactions always involve the formation of one or more new substances.
- Chemical reactions often involve a temperature change.
- Formulae are used to show the elements bonded together in a compound e.g. H₂O contains 2 hydrogen atoms and one oxygen atom.
- Compounds can only be separated into their elements by a chemical reaction

a. e.g. $2H_2O \rightarrow 2H_2 + O_2$

- 5. In **chemical equations** the three **states of matter** are shown as:
 - **a.** solid = (s); liquid = (1) and gas = (a)
 - b. aqueous solutions are shown as (aq)
 - c. e.g.
 - d. $2Na(s) + 2H_2O(l) \rightarrow 2NaOH(aq) + H_2(g)$
- An aqueous solution is a substance dissolved in water.

Relative formula mass

7. The relative atomic mass (A_r) is the average mass of the atoms of an element compared to the mass of carbon-12.

- The relative formula mass (Mr) of s substance is the sum of the A_r of all the atoms in the formula.
 - a. e.g. What is the M_r of water (H_2O) ?
 - b. $(A_r H = 1.0; O = 16.0)$
 - c. There are 2 x H and 1 x O in the formula

d. $(2 \times 1.0) + (1 \times 16.0) = 18.0$

- A_r and M_r have **no units** as they are relative masses.
- 10. In a balanced chemical equation:
 - a. sum M_r reactants = sum M_r products
 - **b.** e.g. $2H_2O_2 \rightarrow 2H_2O + O_2$
 - c. Mr reactants = $2 \times 34 = 68$
 - d. Mr products = $(2 \times 18) + 32 = 68$
- 11. The percentage mass of an element in a compound can be calculated using the relative atomic mass and the relative formula mass.

% by mass = $\frac{A_r x \text{ number of atoms in a compound}}{M_r \text{ of the compound}} \times 100$

Conservation of mass and balancing equations

- 12. No atoms are lost or made during a chemical reaction.
- 13. mass of products = mass of reactants
- 14. Chemical reactions can be represented by symbol equations which are balanced.
- 15. This means the number of atoms of each element is balanced e.g.
- $16.2Mg + O_2 \rightarrow 2MgO$
- 17. there are 2 magnesium atoms on each side of the equation.
- 18. Some reactions may appear to involve a change in mass, but this is normally because a reactant or a product is a gas e.g.
- 19. $Mg(s) + 2HCI(aq) \rightarrow MgCI_2(aq) + H_2(g)$
- 20. During the reaction hydrogen gas is produced. If the gas is free to leave the reaction container then the measured mass will decrease.

C3.2 Knowledge Organiser

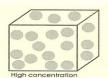

Science Mastery

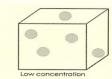

Uncertainty

- 21. Scientific uncertainty means there is a range of possible values within which the true value of a measurement lies.
- 22. Whenever a measurement is made, there is always some uncertainty about the result obtained.

Concentration

23. Many chemical reactions take place in solutions.

- 24. The more concentrated a solution the more particles it contains in a given volume.
- 25. The concentration of a solution can be measured in mass per given volume of solution e.g. grams per dm³ (g/dm³).
 - a. mass of solute = concentration
 - b. volume of solution
- 26. Volumes need to be in **dm**³ 27. 1 dm³ = 1000 cm³

Making soluble salts

- 28. Soluble substances dissolve in a solvent
- 29. Insoluble substances cannot dissolve in a solvent
- 30. Neutralisation reaction general equation is acid + base → salt + water
- 31. Metal + acid → salt + hydrogen
- 32. Metal oxide + acid → salt + water
- 33. Metal hydroxide + acid → salt + water

- 34. Metal carbonate + acid → salt + water + carbon dioxide
- 35. Soluble salts can be made from acids by reacting them with solid insoluble substances, such as metals, metal oxides, hydroxides, or carbonates.
- 36. The solid is added to the acid until no more reacts and the excess solid I filtered off to produce a solution of the salt.
- 37. Salt solutions can be crystallised to produce solid salts.
- 38. Copper oxide reacts with sulfuric acid solution to produce copper sulfate and water
- 39. This reaction can be represented with the equation CuO(s) + H₂SO₄(aq) → CuSO₄(aq) + H₂O(l)
- 40. Copper sulfate solution is a blue liquid
- 41. Copper sulfate crystals are blue

RE Year 9 Spring: Festivals and Rites of Passage

Key Words:

Covenant: A promise between God and man

Talmud and Tenakh: Jewish scripture

Shema: Jewish prayer

Synagogue: Jewish place of

Worship

Torah Jewish Holy Scripture

Rabbi: Jewish religious leader

Yahweh:

Jewish word for God

'Abraham circumcised his son Isaac at the age of eight days as God had commanded him.'

Genesis 21:4

Passover

- Reminds them of the Angel of Death passing over during their time of slavery in Egypt. (Ten plagues)
- Reminds them of their covenant with God
- Eat unleavened bread doesn't rise
 shows the hurry of the Jews
 leaving slavery.
- Sedar meal everything is symbolic e.g. bitter herbs – to symbolise the bitterness of slavery.
- Sedar wine is drunk to remember God's four promises to Moses.

Birth and Brit Milah

- A baby girl is given her names in the synagogue after her father has performed a special reading from the Torah. Boys are names after eight days, during the circumcision.
- BRIT MILAH: symbolises the covenant made by Abraham.
- The baby boy has his foreskin removed at eight days old buy a specifically trained Mohel.
- One of the most observed mitzvot, ancient ritual.
- Shows God their loyalty and faith.

Rosh Hashanah

- Jewish New Year
- On this day God writes down his judgement on each person
- They reflect on their past year and making peace with others.
- Eat apples dipped in honey to symbolise a sweet new year.
- Shofar (ram's horn) is blown to remind Jews that God will judge them.
- Tashlikh: Jews empty their pockets to symbolise getting rid of sin.

Bar/Bat Mitzvah ❖ Boys have a Bar Mitzvah at 13,

- girls a Bat Mitzvah at 12

 They are then responsible for their own actions and religious path.
- Boys can now lead a synagogue service, included in a minyan or read from the Torah. REFORM = girls also can do this.
- Boys must study and prepare a passage from the Torah to read during the ceremony. This means they must learn Hebrew. Girls must spend more time learning how to prepare for Shabbat, as well as learning a prayer to recite.
- After the service a special meal is eaten and shared, with big celebrations and parties for families and friends.

Yom Kippur

- Day of Atonement
- Holiest day of the year, 10 days after Rosh Hashanah
- God makes his final judgement on whether they have been good/bad.
- Confessing wrongdoing is very important.
- ❖ Fast (don't eat or drink) for 25 hours.
- Wear white to show purity.
- ❖ Avoid make-up/perfume and bathing.
- Pray a lot of the day in the synagogue.

Why are festivals important?

- Helps bring the community together
 - Strengthens their faith,
- Brings them closer to God
- Time to remember key parts of history
- Orthodox = continuing tradition is vital

'Live in booths for seven days.'

'Do not eat bread with yeast in'

'Then

Jacob

tore his

clothes,

outon

sackcloth

and

mourned

for his

son for

many

days.'

Genesis

37:34

'See I have set before you this day life and good, death and evil...choose life"

Funerals and Mourning

- Traditionally the bodies are buried. Reform may use cremation.
- Use a simple wooden coffin/white cloth.
- Should take place within 24 hours of death and the body should never be left alone.
- Family and friends pay respects, to the body covered in a shroud and tallit for the men.
- Can take place in a synagogue, at home or the cemetery.
- Services include readings, singing psalms and a eulogy.
- Everyone washes their hands in a ritual outside, symbolising leaving death behind.
- After the funeral there is a meal of consolation.
- Stones are left instead of flowers, because stones are permanent.
- The seven days after are an intense mourning period, where they stay at home, reject luxuries and fun activities and may wear a torn black

ribbon or cut tie to show sorrow.

<u>Marriage</u>

- During the ceremony the couple stand underneath a canopy called a Chuppah, representing a new home.
 The Policies and offers
- The Rabbi talks and offers advice.
- Seven blessings are said and then the plain metal rung is placed on the bride's finger.
- Orthodox: must be witnessed by two men. Reform: Men or women.
- After the contract is signed the groom stamps on a glass as a reminder of the destruction of the temple.
- The couple then have some time together before the meal and party.

History Year 9 Spring: How did the Nazis control hearts and minds? ***

Key Words

Antisemitism- Hostility or aggression in words/actions) OR prejudice (treating someone negatively) because they are Jewish

Propaganda - Using the media to try and persuade people to believe a certain point of view.

Nazis- Short for the National Socialist German Workers Party. They were the political party that Hitler was the leader of.

Nazis changed the school day to brainwash ${\it German}$ children

▼ T A tunical day's timetable at a mixed school in Reglin 1936 Fuganies is the study of

	Lesson 1	Lesson 2	Lesson 3	Lunch	Lesson 4	Lesson 5	Lesson 6
Boys	German	History/ Geography	Eugenics/ Nazi Theory	Sport and	Physics and Chemistry	PE: boxing, football and marching	Maths
Girls	German	History/	Eugenics/	music clubs	Biology/	Cookery	Maths

health and

sex education

The Nazis heavily invested in jobs for the German people. This increased their popularity greatly

Unemployment in Germany (1921-1939)

The Concentration camps

The first camps were set up as soon as Hitler came to power

They were run by the SS

Prisoners were forced to do hard labour on poor rations with tough discipline

Random executions were common

Jews, Socialists, Communists, trade unionists, churchmen and any other opponents of the Nazis ended up there

The SS

Formed in 1925 from fanatics personally loyal to Hitler
Led by Heinrich Himmler
It had responsibility for destroying opposition and carrying out the racial policies of the Nazis
Waffen SS fought alongside the army and Death's Head units ran the extermination camps

The Gestapo

The Gestapo was the secret state police

It was the force most feared by the German people

They had the power to arrest on suspicion and send suspects to concentration camps

They relied on information from informants

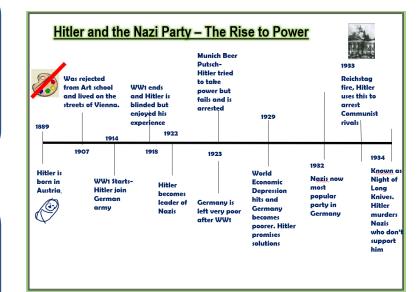

Germans thought that the Gestapo had greater power and reach than it did

The Police and Courts

Nazis were appointed to command local police forces

Nazis controlled judges, magistrates and lawyers

Opponents of the Nazis would not receive a fair trial

Time Period	Specific date	Treatment of Jewish people
Romans 100BC-400AD	4 th century	Blamed Jewish people for the death of Jesus Christ
Norman England 1066-1100	1066	William the Conqueror invited Jews to settle in Norman England and even offered the protection
Middle Ages 1000-1500	1100	Jewish people wrongly accused of murdering Christian children and anti-Jewish feeling grew.
	1190	150 Jewish people die after being trapped inside a tower
	1290	King Edward I ordered all Jews to leave the country, England became the first European country to expel the Jewish people
Early Modern 1500-1700	17 th and 18 th centuries	New inventions and discoveries helped challenge existing ideas. Religion, for some, was no longer as important as it once was. People were seen as equal despite their beliefs
Industrial Period 1700-1900	18 th and 19 th centuries	Slowly, laws began to be lifted and Jewish communities took opportunities gave to them and made contributions to their countries.
	1870	Wilhelm Marr introduced a word for his beliefs- Antisemitism. He also claimed that Jews were a separate race, rather than a religion.
Modern Period 1900-2022	1900	Some people claimed Jews were responsibly for Germany's defeat in WW1, which was completely untrue.
	1920's	Rise of Nazis and Antisemitism concerned German Jews but many did not think he would be in power long.

History Year 9 Spring: The Cold War- When is a war not a war?

Key Words

Atomic Bomb - The belief that strong countries should have the biggest and strongest army and navy possible.

Hiroshima and Nagasaki

Communism- Agreements between countries to work together
Capitalism- The belief that a

strong country must have a large empire

Cold War- Being extremely loyal to and proud of your country Arms Race-Took place on July 24th in Sarajevo. Started a chain of events that start the First World August 1945 at 8.15am, an American bomber plane dropped the world's first atomic bomb on the Japanese city of Hiroshima. 80,000 people died as a direct result of the blast, and another 35,000 were injured. Even after this devastation, Japan did not surrender.

Three days later, another nuclear bomb was dropped by the Americans on the Japanese city of Nagasaki. At least 74,000 people died in the Nagasaki blast or from subsequent injuries.

Berlin Blockade

Stalin, in response to West uniting their sectors of Berlin, blockaded the city. This placed millions into potential starvation.

In response, West launched airlift of supplies for eleven months. Consequences

- 1st conflict of Cold War, no one knew how it would turn out. Would the planes be shot down, would this lead to war? Led to increased tension between the superpowers.
- NATO and Warsaw Pact set up afterwards. This mean't a future war would now include members of both alliances.

Berlin Wall Reasons for the Wall

War

People living in West Berlin enjoyed a high standard of living.
For those living in East Berlin and East Germany life was hard and standard of living was poor. They were constantly reminded of their differences. Between 1945 - 60 it is thought that 3 million people crossed from East to West Berlin.

Consequences

- Flow of refugees reduced to a trickle
- propaganda victory for the 'West' – they claimed Communist countries had to build a 45km wall to imprison people

Cuban Missile Crisis

After the USA's failed attempt to overthrow the Cuban leader Castro, USSR's leader Khrushchev saw an opportunity to challenge the USA. He argued he wanted to install the missiles with nuclear war heads in Cuba to stop the US taking any action against Cuba. The USA also had similar missiles based in Turkey very close to the USSR. Kennedy believed the missiles were a direct threat to the USA as Cuba was only 90 miles off the US coast. It sparked a 13 day stand off that could have brought the world to nuclear annihilation.

Consequences

- The two sides sign The Nuclear Test Ban Treaty was signed. This banned testing of nuclear weapons above ground.
- A hotline was set up to allow direct communications between Washington DC to Moscow to avoid any future crises coming so close to a war
- Khrushchev was made to look weak in the eyes of the Russian people for removing the missiles

Kennedy had stood up to the Soviet Union and forced the missiles to be removed

Capitalism

- Low taxes, poor should work way out of poverty, accept society will be unequal.
- Private ownership of Land and businesses. Owners keep profits.
- Free elections/Press
- Tend to be popular with the rich/owners of industry

Communism

- Believe in an <u>equal</u> society, <u>confiscate</u> property of rich to share with poor, encourage <u>revolution</u> against 'capitalist' class (rich),
- Internationalist
- Dictatorship
- · Control all media
- Lack of personal freedom

Remarkable - include the scale, numbers involved

Resulted in change - include what changes or developments occurred at the time and later

Revealed - include what attitudes were at the time

Remembered - Include how do we remember today

Relevant - how does
the event/person/development affect people
today, what lessons can be learnt

Geography Year 9 Spring Term - Why are biomes brilliant?

What do I need to know?	
What is an ecosystem?	
How does energy move around an ecosystem?	
What are the characteristics of a TRF?	
Why are rainforests under threat?	
How do plants and animals adapt to their environment?	
How did I collect data at Chester Zoo?	
How can I analyse my fieldwork data?	
What are the UK ecosystems?	
How are people changing Savannah Grasslands?	

Skills to develop

Fieldwork skills

Data presentation and analysis

What is an ecosystem?

An ecosystem is a community of plants and animals sharing an environment. They can be small such as ponds or large called biomes

Where do we find biomes?

Every location on the planet is within a biome.
This is often determined by climate and/or altitude. Examples: tropical rainforest, tundra, desert and deciduous forest.

How does energy move around an ecosystem?

Energy is moved between living organisms through the food chain.

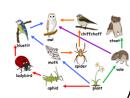

Producer: Plants that produce their own

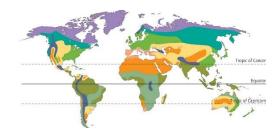

energy through photosynthesis

Consumers: Feed off other living organisms e.g. herbivores, carnivores and omnivores.

A food web is made up of many food chains

When one part of the food web is altered, it can impact the rest of the food web. This can cause some species to die out and others to thrive.

Tropical Rainforests (TRF)

Tropical rainforests are found in a continuous band north and south of the equator. They are found in South America, Asia and Africa.

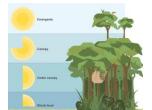

The climate is hot all year round and has wet and dry seasons. This causes high biodiversity

Characteristics of TRF

There are 4 layers of the TRF. Each receives less light than the layer above it. Plants compete to reach sunlight.

Each layer has different features with different animals living in each one.

Geography Year 9 Spring Term – Why are biomes brilliant?

Key Words				
Biome	A biome is a very large ecosystem e.g. Tropical Rainforest.			
Sustainable	Meeting the needs of people today and in the future, while limiting harm to the environment.			
Desertification	The process by which fertile land becomes desert, typically as a result of drought, deforestation, or inappropriate agriculture.			
Adapt	When someone or something adjusts themselves to different conditions or environments.			
Decomposition	The breakdown of dead organic matter (plants and animals) by living organisms			
Afforestation	The opposite of deforestation. If trees are cut down, they are replaced to maintain the canopy.			
Abiotic	Non-Living items in an ecosystem such as rocks soil and water.			
Biotic	The living parts of an ecosystem.			
Mangroves	A shrub or tree that grows in coastal waters			
Tundra	Treeless regions found in the Arctic and on the tops of mountains, where the climate is cold and windy, and there is little rainfall			
Food chain	A series of organisms each dependent on the next as a source of food.			

What are the impacts of deforestation?

It can cause local and global effects:

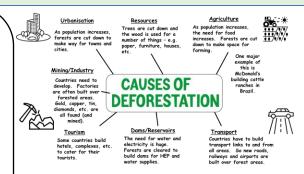

- 1. Soil erosion: the removal of plants can wash soil away
- 2. Loss of biodiversity: habitats lost when trees removed.
- Climate change: less evaporation and CO2 removed
- 4. Economic development: Cattle ranches and other settlements have been abandoned due to poor soil on previous rainforest areas

How are plants and animals adapted?

Plants and animals may have to adapt to: soil quality, temperature, precipitation, competition, protection

This can be done by:

Camouflage, hard shells, flight, horns, poison, strength, long roots, large leaves, tall trees, special features

Chester Zoo Fieldwork

Hypothesis: Does Chester Zoo manage tourism effectively?

Methods:

- Environmental Quality: to assess success of facilities put in place for tourists (presented as a radar graph)
- 2. Pedestrian count: to assess the busiest locations in the zoo. (presented as proportional flow lines)

What are the UK's ecosystems?

Moorland: Rough grasslands, peat bogs, used for shooting grouse

Woodland: Of UK land area 12% is woodland, is ancient forest and 80% is less than 100 years old.

Wetlands: Low-nutrient, water logged soils, vita habitat for birds and insects

Heathlands: Some are dry, some marshy, lots of rare species

How are people changing Savannah grasslands?

Dry all year round. Located around tropics.

At risk of **desertification** due to population growth, deforestation, over grazing and CC. People are combatting this by: reducing livestock, stone lines and the great green wall

Geography Year 9 Spring Term – Who are the global superpowers?

What do I need to know? What is globalisation? What are the positives and negatives of globalisation? How is Disney a globalised company? How globalised are you? How has apple had a negative impact? What is glocalization? How does trade affect globalisation? What is a Superpower?

Skills to develop

Map skills
Analysis of data
Develop answers to extended questions

What is globalisation?

The process by which the world is becoming increasingly linked. Also the process where 'the world is becoming smaller'

Impacts of Globalisation

There are many impacts of companies becoming more global and people becoming more connected.

Positives:

- MNCs can grow more easily
- New jobs and skills for people leading to development
- Sharing ideas, food and lifestyle
- Awareness of global events

Negatives

- Small businesses could be put out of business
- Cultural erosion westernisation
- Lack of law enforcement may mean more exploitation
- Not all wealth is shared evenly

What is a MNC?

Multi-national companies.
Companies which operate around the world.

Some examples include Nike, Apple and McDonalds

How is Disney a globalised company?

Disney was established in 1926. Since then the company has expanded and shows globalisation through:

- Opened first theme park in 1955. Since then expanded to Florida, Tokyo, Paris and Hong Kong
- Own multiple companies: star wars, ABC family, Pixar and ESPN
- Films set in multiple countries and released in many languages
- Dis ney Stores in countries around the world

Geography year 9 Spring Term 2 – Who are the global superpowers?

Key Words				
Globalisation	The process by which the world is becoming increasingly linked as a result of the development of new technology, improvement in trade and cultural exchange			
MNC	Multi-national companies. Companies which operate around the world. Their headquarters may be in one country with factories in another.			
Trade	The selling and buying of goods and services we want and need.			
Export	Goods sold to other countries			
Import	Goods bought by a country			
Glocalization	When businesses adapt to the tastes of the country they are based in to make profit			
Containerisation	The use of steel containers to transport goods.			
Superpower	A country with global influence on other countries			
Primary goods	Low value products such as food and wood			
Manufactured goods	High value products such as cars			
Trading bloc	Groups of countries in specific regions that manage and promote trade activities			

How has Apple had a negative impact?

Apple is an MNC with headquarters in California USA, factories in China, raw materials sourced from Indonesia and 451 stores world wide. However, by placing factories in emerging countries, issues have arisen

- Workers paidless than \$1 a day
- Shifts 12 hours in length
- Children employed
- Passports and IDs taken from people

Poor working conditions such as unsuitable training for jobs and people falling asleep at machines

What is glocalisation?

When businesses adapt to the tastes of the country they are based in to make profit

This can take many forms:

- Alternative menus
- Different modelling of shops or restaurants
- Advertising of certain products

McDonald's and Glocalisation

McDonald's has 40,000 restaurants worldwide. About 480 are in India. They faced challenges when setting up.

- Beef not served due to vegetarian diet and religious commitments
- Many people did not eat takeaway
- Food made cheaper due to higher levels of poverty
- Some ingredients changed as could not be grown.

How does trade affect globalisation?

Trade is vital to the development of countries.

Trade has become easier due to several factors:

- Development of trading blocs: they allow free trade and cheaper products
- Development of countries
- Containerisation: where goods can now be transported on a larger scale through the use of shipping containers

What is a global superpower?

A country which has significance impact on others can be called a superpower. There are several factors which influence this:

- Land area; greater resources, not reliant on other countries
- Population size; lots of workers
- Military; troops around the world
- Economics; strong currencies, easier to borrow money, money breeds money
- Culture; companies set up in poorer countries and send money back, TV and film

Spanish Year 9 Spring Term - Diet and Exercise

¿Llevas una dieta sana? Do you have a healthy diet?

Llevo una dieta sana = I have a healthy diet

Me gusta (n) mucho = I really like Me gusta (n) bastante = I quite like No me gusta (n) = I don't like

No me gusta (n) nada = I really don't like

el arroz = rice

el pan = bread

el pollo = chicken

el pescado = fish

la carne = meat

la ensalada =salad

la pasta = pasta

la pizza = pizza

los caramelos = swee...

los huevos = eggs

los pasteles = cakes

las galletas = biscuits

las verduras = vegetables

como = I eat

comí = I ate

bebo = I drink

bebí = I drank

Useful Phrases

Empecé a jugar = I started to play a los (diez) años = at the age of (ten) Voy a empezar a jugar = I'm going to start playing

Voy a empezar a hacer = I'm going to start doing

Expressions of Frequency

tres veces al día = three times a day
cada día = each day
todos los días = every day
dos veces a la semana = twice a week
los fines de semana = at the weekends
una vez al mes = once a month
muy a menudo = very often
a veces = sometimes
de vez en cuando = from time to time
casi nunca = almost
nunca = never

¿Qué haces para estar en forma? What do you do to keep in shape?

Me gusta mucho hacer deporte = I like to do sport Hago artes marciales = I do martial arts

Hago atletismo = I do athletics

Hago footing = I do jogging

Hago gimnasia = I do gymnastics

Hago natación = I do swimming

Juego al baloncesto = I play basketball

Juego al ping-pong = I play table tennis

Juego al tenis = I play tennis

Juego al voleibol = I play volleyball

Juego a la pelota vasca = I play pelota

en el parque = in the park

en el gimnasio - in the gym

Voy al polideportivo = I go the to the sports centre Soy miembro de un un club = I'm a member of a club

Voy a clases de baile = I go to dance classes

Préfiero jugar al fútbol = I prefer to play football Es mi deporte preferido = it's my favourite sport

Spanish Year 9 Spring Term - Global and local issues

Mis Derechos = My Rights

Tengo derecho = I have the right al amory a la familia = to love and a family al juego = to play a la educación = to education a la libertad de expresión = to freedom of expression a un medio ambiente sano = to a healthy environment a vivir en armonía = to live in harmony No puedo... = I can't ... dar mi opinion = to give my opinion jugar con mis hermanos = play with my brothers and sisters salir solo/a = go out alone dormir = sleep ir al insti = go to school respirar = breathe porque... = because... tengo que ganar dinero = I have to earn money hay mucha violencia en mi ciudad = there is lots of violence in my city mi padre grita mucho = my dad shouts a lot tengo que trabajar = I have to work el aire está contaminado = the air is polluted

No es justo porque = it is not fair because ... Es inacceptable porque = it is unacceptable because....

Nationalities

boliviano/a = Bolivian colombiano/a = Colombian mexicano/a = Mexican norteamericano/a = north American inglés / inglesa = English español/a = Spanis paquistaní = pakistani

El comercio justo = Fair Trade

Tiene años = He /she is years old
Vive = he / she lives
Viven = they live
con su familia = with his/her family
en una plantación = on a plantation
Trabaja = he / she works
Trabajan = they work
catorce horas al día = 14 hours a day
seis días a la semana = 6 days a week
para un patrón = for an employer
para una cooperativa = for a cooperative
Gana = he / she earns

High Frequency Words

mi / mis = my
su/ sus = his/her
nuestro/a/os/as = our
más ... que = more ... than
menos ... que = less ... than

Ganan = they earn

para = for / in order to hay = there is / are había = there were a partir de ahora = from now además = in addition

Year 9 Autumn Term Project 1: Self Expression Portraiture

GLOSSARY

Artists:

Franz Messerschmitt, Vince Low, Luke Dixon, Jenny Saville, Lucian Freud

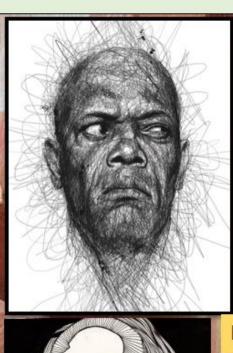

Flesh Tones - Colours which can be found on the human skin

Emotion – A strong feeling from someone's circumstances, mood or relationship with others

Expression – The action of making known one's thoughts or feelings

Depict – Represent something from a drawing, painting or other Art form

Linear – Arrangement of something using lines

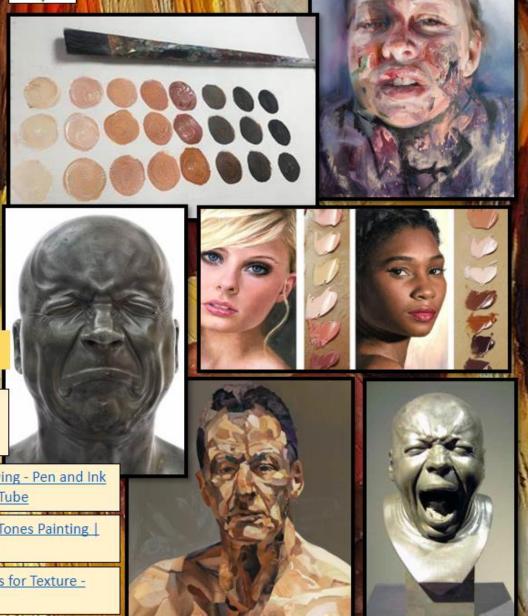

(58) Colour mixing - How to mix skin tones in acrylic paint - YouTube

(58) Expressive Portrait Drawing - Pen and Ink Markmaking | Blvckink - YouTube

(58) Do's and Don'ts of Skin Tones Painting | How To Paint Skin - YouTube

(58) Mark making techniques for Texture - YouTube

Computing Year 9 Autumn Term 1: Bus & ICT

Market Research

There are two Types of Market Research Primary and Secondary. Primary is doing it yourself e.g:

Survey Focus Group

Secondary is someone else's' work

Internet Research

It's important as it tells businesses what people want to buy so you can ensure your selling what people want

Market Segmentation

There are different Market Segments:

Age

Gender

Lifestyle

Location

These are important because it <u>lets</u> the business target its products to the right people through advertising etc.

Key Terms

Market Research: This is carrying Out research of members of the public

Market Segmentation: Splitting
Customers into target audience
Spreadsheet: Software designed
To let you deal with numbers
And calculations

Adobe Fireworks: Software to Let you do graphical work like Create a web page or poster Web Design: Lets you design Website, can be done through Web authoring software or HTML

Word: Designed for typing and Formatting letters and other Documents that need to be Typed up

Spreadsheet

Spreadsheets are good as they allow you to carry out calculations quickly and accurately.

Formulas must start with = sign and use cell referencing- B4

	93	* (*)£ +0	/90			
1	1	Division	50	1	10	7.5
2	*	Multiplication	10	*	8	80
	+	Addition	50	+	10	60
	-	Subtraction	10	-	5	5

Fireworks

Adobe Fireworks has many tools
Which can be used to change images:

- -Remove Background
- -Create Shapes
- -Move parts of an image

HTML

This is the code used to create a website there is a 'tag' for instructions:

- means insert an image
- <h1> means a main Heading
- <P1> means a paragraph

Computing Year 9 Autumn Term 2: Logic Gates

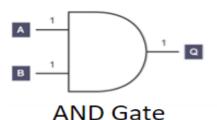

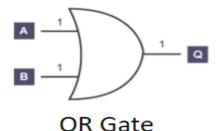

Logic Gates

Logic Gates represent how a circuit Board within a computer works:

Truth Tables

INPUT		OUTPUT
Α	В	OOIFOI
0	0	0
1	0	0
0	1	0
1	1	1

INPUT		OUTPUT
А	В	001101
0	0	0
1	0	1
0	1	1
1	1	1

Α -	1	>>>
^ -		

INPUT	OUTPUT	
Α		
0	1	
1	0	

NOT Gate

Key Terms

Binary: This is a number system that only uses two digits: 1 and 0. All information that is processed by a computer is in the form of a sequence of 1s and 0s.

Logic Gate: This is a circuit within a Computer

AND Gate: When both switches on the circuit are on the output will be on. Eg both light switches need to be on for the light to come on.

OR Gate: Only one switch needs to be on for the output to go on, eg in either a hall light switch or landing light switch is on the landing light will go on.

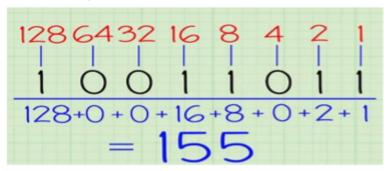

NOT Gate: This is the opposite, if the switch is on the light will be off and vice versa

Truth Table: This is a table which shows how the Logic Gate is working on is represented by 1 and 0 means it is off

Binary

Computers use something called binary code. Binary code is made up 1s and 0s.

Binary Addition

$$0 + 0 = 0$$
 $1 + 0 = 1$
 $1 + 1 = 10$
 $1 + 1 + 1 = 11$

DT Year 9 Unit 1: Health and Safety

Glossary

Health and Safety

•regulations and procedures intended to prevent accident or injury in workplaces or public environments.

Why do you think workshop Safety Rules are important? If everyone follows workshop rules, everyone will be safe and learn how to use tools and equipment properly and efficiently.

- 1. Always listen carefully to the teacher and follow instructions.
- 2. Do not run / rush in the workshop.
- 3. Know where the emergency stop buttons are positioned in the workshop.
- 4. Always wear an apron.
- 5. Wear good strong shoes. Trainers are not suitable.
- 6. When attempting practical work, all stools should be put away.
- 7. Bags should be stored away, during practical sessions in the workshop.
- 8. When learning how to use a machine, listen very carefully to all the instructions given by the teacher. Ask questions, especially if you do not fully understand.
- 9. Do not use a machine, if you have not been shown how to operate it safely, by your teacher.
- 10. Always be patient, never rush practical work.
- 11. Always use guards, when operating machines.
- 12. Keep hands / hair and clothing away from moving/rotating parts of machinery.
- 13. Use hand tools carefully, keeping both hands behind the cutting edge.
- 14. Report any damage / faults to machines/equipment. Damage or a faulty part, could cause an accident.
- 15. Keep your workbench tidy. When you have finished with a tool / piece of equipment, return it to its storage cupboard / rack.
- 16. Never distract another pupil, when they are working on a machine or using tools / equipment.

DT Year 9 Unit 2: Sustainability and the 6R's

Sustainability

Is the avoidance of the depletion of natural resources in order to maintain an ecological balance: Eg: if a tree is cut down for paper, another tree is planted in its place.

Finite resources

Finite resources are non-renewable and will eventually run out. Metals, plastics and fossil fuels (coal, natural gas and oil) are all examples of finite resources.

Non-Finite resources

Non-finite resources are found naturally and can be replaced. Examples include wood, cotton and renewable energy sources such as solar and wind.

6 R's

Rethink

Refuse

Repair

Reduce

Re-use Recycle

6Rs - Practical Action Puma Clever Little Bag - fuseproject

Plastics challenge - Practical Action

9 Useful Things Made Entirly By Reusing Plastic Bottles (sadtohappyproject.com)

Impact on sustainability

We now consider more the materials and energy we use are **sustainable**. This includes where the resources come from and how they are disposed of at the end of their life.

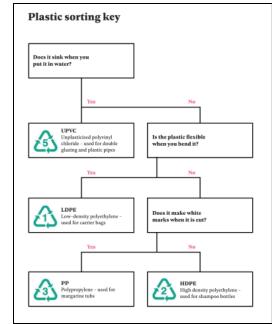

Waste disposal

Households are encouraged to recycle waste items where possible, including products made from various materials such as hard plastics, paper and steel. In 2016, the UK recycled 25 per cent of household waste, with the target of 50 per cent in 2020. All other waste goes to landfill sites, which release harmful gases that pollute the surrounding air and soil.

DT Year 9 Unit 5: Crazy Contraptions

Glossary

Crazy contraptions

A device or machine that looks awkward or old-fashioned, especially one that you do not know how to use.

Kinetic Artist

Relating to or resulting from motion.

Winch

a hauling or lifting device consisting of a rope or chain winding round a horizontal rotating drum, turned typically by a crank or by motor.

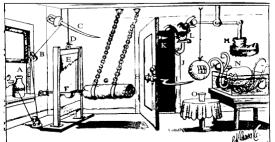

Pulleys

a wheel with a grooved rim around which a cord passes, which acts to change the direction of a force applied to the cord and is used to raise heavy weights.

Chain reaction

a series of events, each caused by the previous one:

Think of the 'Mouse Trap Game'. There is a system of tubes, steps and winches etc. that allow a mouse to be caught. How could you catch a mouse?

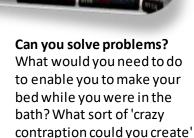

Joseph Herscher, Kinetic designer

Seeing Chain Reaction in Action

Making Chain Reaction Elements

Designing for the Chain Reaction Activity

Chain reaction Resources

Chain Reaction Workshop Elements: 10 Steps - Instructables

Year 9 Physical Education:

Enhancing skills and applying strategies

- Expectations
- Standards
- Skill/technique recap

Health Related Fitness Benefits of Physical Activity

- Fitness testing
- Planning a training programme
- Principles of Training
- Anatomy Vocabulary

Wider Curriculum Competitive Sports & Activities

- Extra Curricular
- Inter-form
- Sports Day
- Community Links
- School trips

Sports/Activities taught

Netball

Football

Hockey

Handball

Cricket

Rounders

Basketball

Table Tennis

Badminton

Strategies to overcome opponents in competitive sport (Games)

- Teamwork
- Rules & regulations
- Sport specific skills whilst moving
- Tactics to overcome opponents
- Application of technique

Develop techniques and improve performance in other competitive sport. (Individual)

- Athletics: Race strategies (Pace)
- Trampolining: Basic Combinations

Outdoor & Adventurous Activities

- Team building
- Problem solving
- Oracy & Communication Skills
- Intellectual challenge
- Physical Challenge

- Desire to Improve: assessments will demonstrate improvements to achieve your personal best. Evaluation of Performance. Influencing the outcome and end result of the performance. Influencing the outcome & end result of the activity.
- Commitment, Resilience & Respect across the learning journey.

: Gender

Identity

PSHE: Year 9 Autumn Term: Sexuality and Gender Identity

40-	
	Glossary
Asexual	A person who generally does not experience sexual attraction to any group of people
Androgyny	A gender expression that has elements of both masculinity and femininity
Biological Sex	The physical anatomy and gendered hormones one is born with.
Bisexual	A person who experiences sexual, romantic, physical, and/or spiritual attraction to people of their own gender as well as a nother gender
Cisgender	A description for a person whose gender identity, gender expression, and biological sex all align
LGBTQ+	Lesbian Gay Bisexual Trans Queer / Questioning + = Other
Sexuality	A persons sexual preference or orientation. Who they are attracted to.
Gender Dysphoria	Where a person experiences distress due to a mismatch of their biological sex and their gender identity. $ \frac{1}{2} \int_{-\infty}^{\infty} \frac{1}{2} \left(\frac{1}{2} \int_{-\infty}^{\infty} \frac{1}{2} \int_{-\infty}^{\infty} \frac{1}{2} \left(\frac{1}{2} \int_{-\infty}^{\infty} \frac{1}{2} \int_{-\infty}^{\infty} \frac{1}{2} \left(\frac{1}{2} \int_{-\infty}^{\infty} \frac{1}$
Heterosexual	A medical definition for a person who is attracted to someone with the other gender.
Homosexual	A medical definition for a person who is attracted to someone with the same gender.
Transvestite	A person who dresses as the opposite gender expression for any one of many reasons, including relaxation, fun, and sexual gratification.
intersex	A person with a set of sexual anatomy that doesn't fit within the labels of female or male (e.g., XXY phenotype, uterus, and penis) $ \frac{1}{2} \left(\frac{1}{2} \right) = \frac{1}{2} \left(\frac{1}{2} \right) \left($
Pansexual	A person who experiences sexual, romantic, physical, and/or spiritual attraction for members of all gender identities/expressions
Transgender	A person whose gender identity is the binary opposite of their biological sex, who may undergo medical treatments to change their biological sex
Transsexual	A person whose gender identity is the binary opposite of their biological sex, who may undergo medical treatments to change their biological sex

Gender identity is a way to describe how you feel about your gender. You might identify your gender as a boy or a girl or something different. This is different from

your sex, which is related to your physical body and biology.

Important legal changes that have affected LGBTQ+
people in the UK

- 2000: Government lifts the ban on lesbians and gay men serving in the Armed Forces.
- 2001: Age of consent for gay/bi men is lowered to 16.
- 2002: Equal rights are granted to same-sex couples applying for adoption.
- 2003: Repeal of Section 28 Section 28 was a law that made it illegal to talk positively about homosexuality in schools.
- 2003: A new law comes into force protecting LGBT people from discrimination at work. Until 2003 employers could discriminate against LGBT people by not hiring them or not promoting them, just because of their sexual orientation or gender identity.
- 2004: Civil Partnership Act is passed.
- 2004: Gender Recognition Act is passed This Act allowed trans people to change their legal gender. This means that they can get a new birth certificate that reflects who they really are, which helps for future legal processes like marriage.
- 2007: It becomes illegal to discriminate against people because of their sexual orientation or gender identity when providing them with goods or services.
- 2008: The Criminal Justice and Immigration Act makes 'incitement to homophobic hatred' a crime.
- 2009: A new law gives better legal recognition to same-sex parents.
- 2013: The Marriage (Same-Sex Couples) Act is passed.

Trans Teens and Children

If a child is under 18 and thought to have gender dysphoria, they'll usually be referred to a specialist child and adolescent Gender I dentity Clinic (GIC). Treatment is a rranged with a multidisciplinary team (MDT). This is a group may include specialists such as mental health professionals and paediatric endocrinologists. Most treatments offered at this stage are psychological, rather than medical or surgical.

If the child is diagnosed with gender dysphoria and they've reached puberty, they could be treated with gonadotrophin-releasing hormone (GnRH) analogues. These are synthetic hormones that suppress the hormones naturally produced by the body. They also suppress puberty and can help delay potentially distressing physical changes caused by the body becoming even more like that of the biological sex, until they're old enough for other treatment options. The effects of treatment with GnRH analogues are considered to be fully reversible, so treatment can usually be stopped at any time. Teenagers who are 17 years of age or older may be seen in an a dult gender clinic. They are entitled to consent to their own treatment and follow the standard a dult protocols.

Gender Reassignment's urgery will not be considered until a person has reached 18 years of age.

Schools and LGBTQ+ Students

All Schools are required to have a policy relating to LGBTQ+ Students and how they are supported in schools. However each case will be dealt with on an individual basis as to what is best for the students. Discussions will be conducted with Safe guarding team, parents, wellbeing teams and appropriate external agencies involved in the students care.

Where to get more help and support

- Parents and trusted family members
- Teachers and School Staff including School Nurse and Wellbeing Team
- Your Doctor or Community Nurse
- NHS Online
- Young Stonewall: https://www.voungstonewall.org.uk/
- The Proud Trust—Local Support groups: https://www.theproudtrust.org
- Friends and Family of Lesbians and Gays: https://www.fflag.org.uk/

PSHE Year 9 E-Safety & Digital Citizenship

Glossary

E-Safety Strategies and systems to help people stay safe online.

Digital Citizenship Accepted ways on behaving whilst engaging in online activity.

Cyber Bullying The use of electronic communication to bully a person, typically by sending messages of an intimidating or threatening nature

Hacking Gaining access to systems and computers which you do not have permission to access. Can be for malicious purposes.

Grooming When someone uses the internet to trick, force or pressure a young person into doing something they wouldn't normally do, this could be sexual behaviour or radical beliefs.

Digital Footprint The information about a particular person that exists on the internet as a result of their online activity. It can not be deleted.

Where to get more help and support

- Parents and trusted family.
- School Staff and Wellbeing Team
- Directly to the police.
- Report any inappropriate behaviour to the website.
- NSPCC https://www.nspcc.org.uk
- Childline Helpline: 0800 1111(24 hours, every day) / https://www.childline.org.uk
- CEOPS https://www.ceop.police.uk/safetv-centre/

10 strategies for staying safe online

- Don't post any personal information online like your address, email address or mobile number.
- 2. Think carefully before posting pictures or videos of yourself.

 Once you've put a picture of yourself online most people can see it and may be able to download it, it's not just yours anymore.
- 3. Keep your privacy settings as high as possible.
- 4. Never give out your passwords.
- 5. Don't befriend people you don't know.
- 6. Don't meet up with people you've met online. Speak to your parent or carer about people suggesting you do.
- 7. Remember that not everyone online is who they say they are
- Think carefully about what you say before you post something online.
- 9. Respect other people's views, even if you don't agree with someone else's views doesn't mean you need to be rude.
- 10. If you see something online that makes you feel uncomfortable, unsafe or worried: leave the website, turn off your computer if you want to and tell a trusted adult immediately.

Digital Footprints and Online Behaviour

A person's digital footprint cannot be deleted and can be accessed at any time through a simple social media or search engine search. To promote a positive digital footprint there are 5 simple rules:

- 1. Would you want your grandmother to see it? Is that photo/video/comment a ppropriate for the wider public audience? Would you want a future partner or employer to see it? Once something is online it stays forever.
- 2. Do you really think that is private? Just because your privacy settings are high doesn't mean that someone else can't repost or screenshot what you have posted.
- 3. Would you say it to someone's face? If you wouldn't say it to someone face, don't say it online. Portray yourself in a positive way as this may be seen by future friends, partners or employers.
- 4. Is this your work to publish/use? Reposting or using someone else's work if fine if you credit the original owner creator. If you don't it is plagiarism.
- . Would you want someone to do it to you? How would you feel if someone posted a picture of you or made a comments a bout you that you didn't like or want online?

Online Behaviour and the Law

- The Computer Misuse Act 1990 says you can't impersonate or steal someone else's identity online. This means that writing a status on social media pretending to be your friend is technically against the law as it creating fake profiles or websites.
- It is a criminal offence under the Communications Act 2003 to send messages using any public electronic communications network, such as Twitter or Facebook, which are grossly offensive or of an indecent, obscene or menacing character.
- It is a criminal offence under the Criminal Justice and Courts
 Act 2015 for someone to disclose private sexual images of you
 online or offline without your consent with the effect of
 causing you distress. This is more commonly known as
 'revenge porn'.
- There are a range of other offences which the police can investigate including harassment, harassment when someone fears violence, and stalking under the Protection from Harassment Act 1997.

Each case will be taken on an individual basis looking at context and evidence to determine if a crime has been committed. If you believe you have been the victim of a crime screen shot the evidence and speak to the police.
